

3. TeachMePhysiology (teachmephysiology.com/urinary-system) - Provides clear, concise explanations of renal physiology concepts.

Online Courses:

1. Coursera's "Understanding Kidney Anatomy: Glomerular Filtration" by Duke University.
2. edX's "Kidney and Urinary Tract" course by Harvard University.

Video Resources:

1. Osmosis.org - Offers high-quality videos on renal physiology and pathophysiology.
2. Armando Hasudungan's YouTube channel - Includes detailed illustrations and explanations of renal physiology.

Journals:

1. American Journal of Physiology-Renal Physiology - Publishes original research on kidney function.
2. Kidney International - Contains both basic science and clinical research related to the kidney.

Would you like more information on any of these resources or recommendations for a specific aspect of renal physiology?
